

The Annual World Petroleum & Petrochemical Event

Post Show Report

The 19th China International Petroleum & Petrochemical Technology and Equipment Exhibition March 27-29, 2019 Beijing New China International Exhibition Center

Zhenwei Exhibition Group (Hereinafter referred to as Zhenwei Exhibition), founded in 2000 and listed on the New Third Board on November 24th, 2015 (Stock Code: 834316), is China's largest private exhibition company, the Member Unit of National Convention and Exhibition Industry Standardization Technology Committee, the exhibition organization received the most certificates approved by UFI in China, and the Vice President Unit of China Convention and Exhibition Society. With exhibition and convention as the core, Zhenwei Exhibition Group integrates four major businesses: exhibition and convention, data, E-commerce and exhibition design. Zhenwei Exhibition is the leading comprehensive service provider of global exhibition.

Zhenwei Exhibition's Headquarters located in Binhai New Area of Tianjin, owns subsidiaries of Tianjin Zhenwei, Beijing Zhenwei, Guangzhou Zhenwei, Xirjiang Zhenwei, Xirjiang Zhenwei, Chengdu Zhenwei, Nanjing Zhenwei, Hainan Zhenwei and Beijing ZHR SHOWS. In 2015, approved by People's Government of Xinjiang Uygur Autonomous Region, Zhenwei Exhibition Group and Xinjiang International Expo Administration established the first mixed-ownership exhibition company in China, namely Xinjiang Asia Europe International Expo Co., Ltd.

Zhenwei Exhibition Group organizes nearly 100 professional exhibitions and large-scale events in China, the United States, Germany, France, Russia, Canada, Brazil, Indonesia and other countries around the world every year. The main business covered energy, equipment manufacturing, new-energy vehicles, biological medicine, high-end consumption and electronics, environmental protection & energy conservation, ocean and maritime engineering and agriculture of eight industries, which involve in petroleum and natural gas, petrochemical industry, chemical industry, pipeline, mining industry, marine works, new energy, power, battery, super capacitor, charging facilities, industrial automation, robotics, engineering machinery, intelligent equipment, high-end equipment, environmental protection and energy conservation, green construction, heating, consumer electronics, competitive electronics, unmanned aerial vehicles, high-end consumer goods, intelligent agriculture, imported food, health care products and other fields.

The Global Influential Events Held by Zhenwei Exhibition Include:

China International Petroleum & Petrochemical Technology and Equipment Exhibition (cippe)

China (Tianjin) International Equipment & Manufacturing Industry Expo (CIEX)

Asia Pacific Retailers Convention and Exhibition & International Consumer Goods Fair

Chengdu International New Energy & Electric Vehicles Exhibition (CNEE)

Hainan New Energy & Electric Vehicles Exhibition (CNEE)

China International Electric Vehicle Supply Equipment Fair (EVSE)

Guangzhou International Bio-technology Expo (BTE)

China Xinjiang International Agriculture Fair (CXIAF)

Shanghai International Chemical Technology & Equipment Fair (CTEF)

Exhibitions Supported by China's Ministry of Commerce – cippe (Beijing), CIEX, CXIAF, ICME and CIBES

Exhibitions Approved by China's Ministry of Commerce – cippe (Beijing), CIEX, CXIAF, HCI, IME Xinjiang and ICE Xinjiang

Exhibitions Approved by UFI – cippe (Beijing), CIEX, IMEX, CIAI, CXIAF, IME XINJIANG and ICME

Glance of cippe2019 ▶

The Excellent Exhibition Has the Power to Change the World

-cippe2019 supported by China's Ministry of Commerce

In the 13th Five-Year Plan period, the growth emphasis of all industries will be transferred to the quality and the implementation of intelligent manufacturing is the key to the high-quality development of China petroleum and petrochemical industry, which has accumulated rich experience in the process of strengthening independent innovation and improving product quality. Under this background, Chinese enterprises are striving to seize new opportunities to help the whole industry out of the cold winter with new technologies. Furthermore, Chinese petroleum and petrochemical equipment industry benefits from its price and quality advantages and is gaining more and more attention from international customers. Therefore, it generally believes that the global procurement focus is gradually swinging toward China.

Only thinking and working with persistence and perseverance, we can go far away further. In the platform of cippe, we did our best to make all innovation and reforming happen, as well as witnessed the changes of our exhibitors, from small to big and then to powerful.

The excellent exhibition has the ability and influence to make a worthwhile trip for the participants, accelerate the industrial civilization, and affect the development of the world. Definitely, cippe is the event like that in petroleum and petrochemical industry.

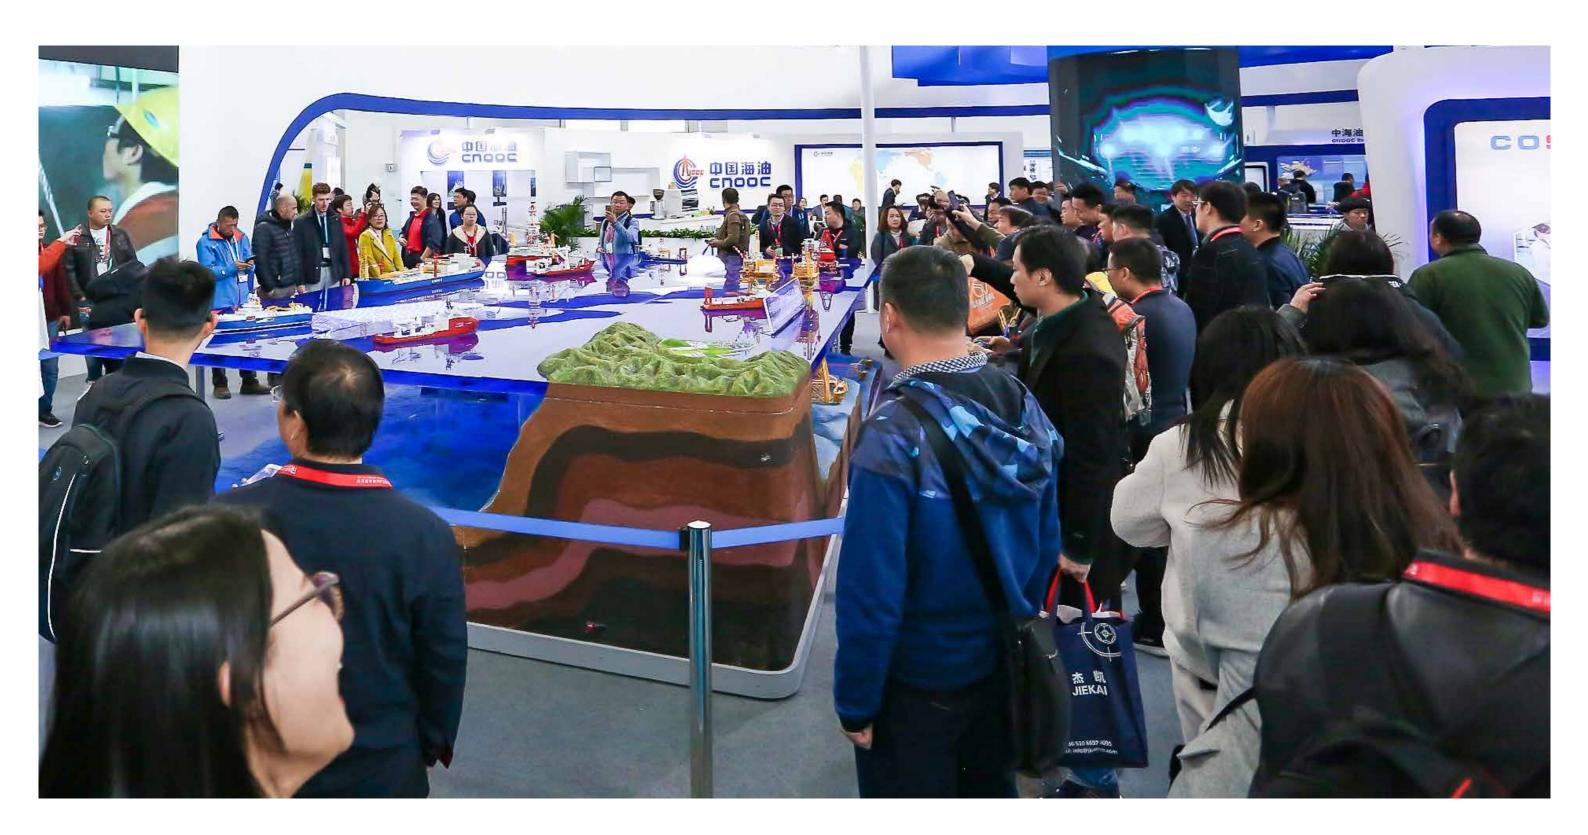

cippe Focuses on Natural Gas

As the energy production and consumption revolution, new urbanization process and oil and gas system reform of China, the natural gas industry is embracing a new development opportunity. At cippe2019, the exhibitors, involving in natural gas include Sinopec Oilfield Equipment Corporation, KERUI Petroleum, SANY HEAVY INDUSTRY, Anton Oilfield Service Group, Shanghai Shenkai, etc. At the same time, the liquefied natural gas (LNG), as the fastest-growing subdivision, is attracting more and more attention. A number of summits launched concurrently with cippe2019, further focus on the development of the natural gas market.

Maritime Engineering Exhibitors Account for 48%

The maritime engineering equipment and high-tech ships were listed as one of top 10 development industries in *Made in China 2025* that proposed to develop the deep-sea exploration and resource utilization, as well as support the equipment for marine operations and the related key systems. According to the statistics from authoritative department, it is estimated that the market demand of global maritime engineering equipment and the high-tech ship will be about 170 billion dollars by 2020, and increased to 260 billion dollars by 2025. In cippe2019, maritime engineering enterprises account for 48%, NOV, API, China Classification Society (CCS), China National Offshore Oil Corporation (CNOOC), China National Petroleum Corporation, Sinopec Group and Hempel Group,etc, highlighted the exhibition.

cippe2019 Welcomes 120,000 Visitors

In the past 19 years, cippe brought together millions of high-quality visitors from home and abroad. The Global Buyers Invitation Plan has also received positive feedback from the market and cippe2019 attracted 120,000 professional visitors and more than 400 purchasing groups.

Concurrent Events Analyze the Industry Development Trend

Through nearly 100 concurrent high-end forums, conferences and new product launches, the visitors interacted fully with exhibitors and speakers, and learned more about the development trend of petroleum and petrochemical industry. This is the power of cippe to make participant's practice to be the mainstream of trend, and turn speaker's opinion into the voice of industry.

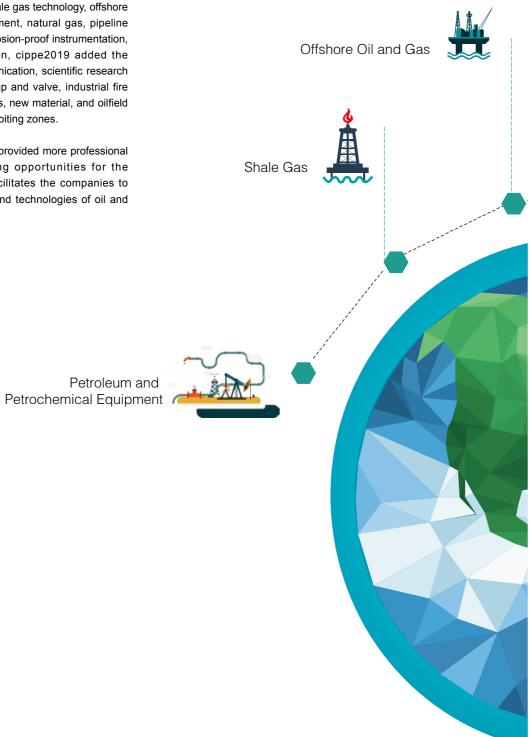

"cippe Gold Award of Innovative Product", "cippe2019 International Petroleum & Natural Gas Summit", "The International Petroleum and Petrochemical Technology Conference 2019", "cippe2019 Embassy (Oil & Gas) Promotion Conference, "cippe2019 Business Matchmaking Meeting" and other thematic events have built numerous interactive opportunities for the visitors and the exhibitors.

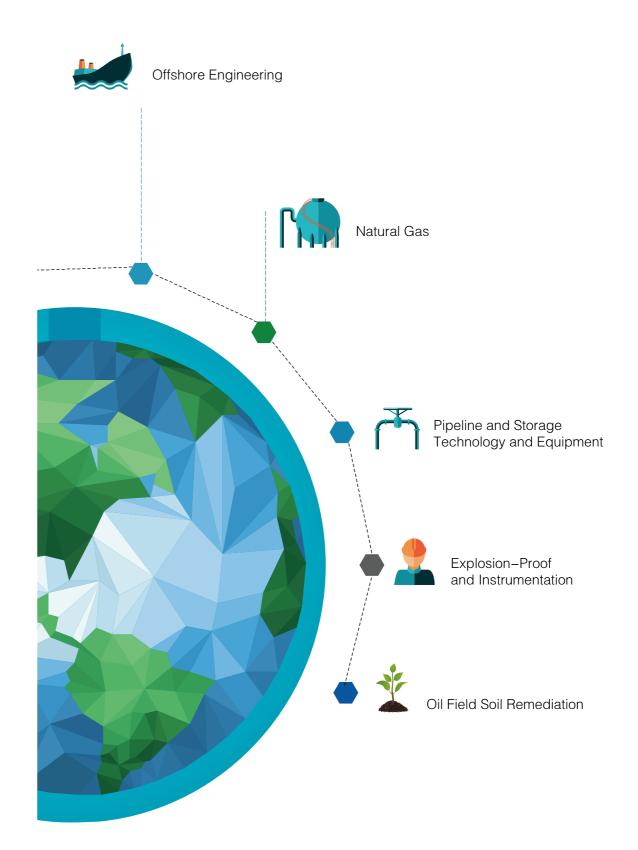

In recent years, cippe cooperated with national policies and strategies actively, and set up a series of thematic events related to the national economy and people's livelihood. In addition, the scientific combination of "convention" and "exhibition" maximized the visitors' interactive experience of ideas and approach to new products and technologies.

Whole Industry Chain Layout Eight Major Categories of cippe

According to the development of petroleum industry and based on eight major categories, including petroleum and petrochemical equipment, shale gas technology, offshore oil and gas, maritime equipment, natural gas, pipeline and storage technology, explosion-proof instrumentation, and oilfield soil remediation, cippe2019 added the intelligent oilfield and communication, scientific research institutes achievements, pump and valve, industrial fire protection and safety products, new material, and oilfield environmental protection exhibiting zones.

The special exhibiting zones provided more professional and accurate matchmaking opportunities for the procurement and greatly facilitates the companies to display the latest products and technologies of oil and gas industry.

China National Petroleum Corporation

With the largest exhibition space, best locations, most exhibits, most highlights, greatest impact, most visitors and most eye-catching, the CNPC pavilion featured with 3,750 square meters space and 20 equipment enterprises at cippe2019. There were more than 300 objects and models exhibited, including 100 new products and technologies, for example, 2500 model electric fracturing truck, 7000-meter pipe column automation rig, "No.10 marine geology" survey ship, QDP2200 five-cylinder drilling pump assembly, coiled tubing service trolley, S340 vibrating screen, 175 No. unit, and other products.

Sinopec Group

At cippe2019, the geological logging company of Sinopec Shengli Petroleum Engineering Ltd. exhibited a series of "explorer" logging equipment with independent intellectual property rights, including Sino WSL comprehensive logging instruments, Sino CLS coal-bed methane logging instruments and more than ten other products. As the logging equipment manufacturing and inspection centers of Sinopec, they have a number of core technologies such as well site safety protection, rapid quantitative detection of hydrocarbon gas, multi-mode data acquisition, logging software development, and sensor research and development.

China National Offshore Oil Corporation

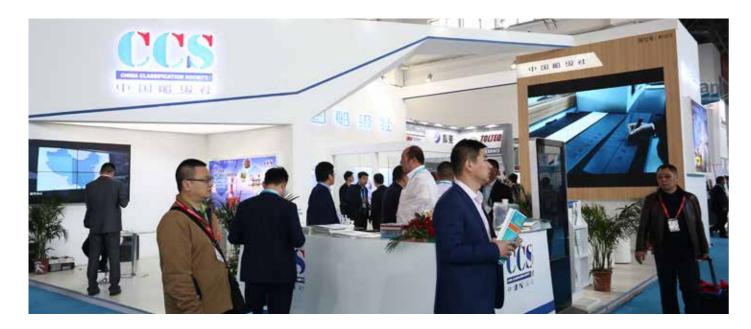

As China largest offshore oil and gas producer, China National Offshore Oil Corporation, has participated in cippe for consecutive years. In cippe2019, their booth covers an area of 1,000 square meters and demonstrated the latest and most advanced products and technologies. CNOOC formed a good interaction with the visitors through the exchanges, promotional videos and VR experience on-site.

Founded in 1929, Huisman Group is a global company and has extensive experience in the design and construction of heavy construction equipment for the world's leading onshore and offshore engineering companies. Our products mainly include the following six categories: cranes, pipe laying equipment, drilling equipment, winches, ship design and special engineering projects, and range from component to highly integrated engineering systems.

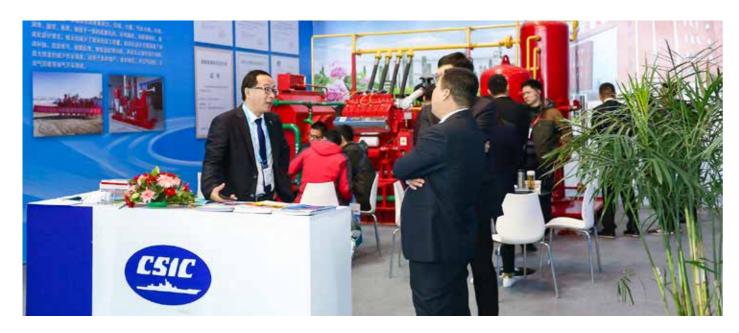

China Classification Society (CCS)

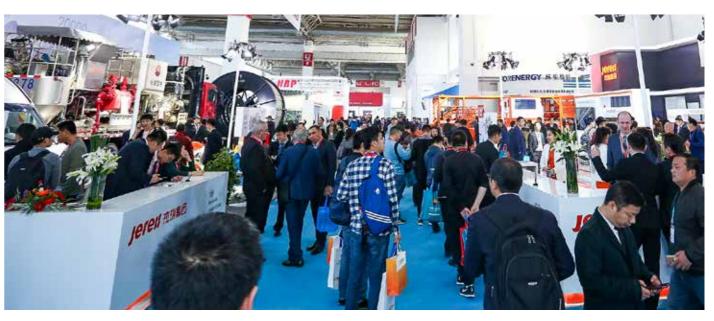

In cippe2019, CCS displayed the latest technological achievements and service in the field of marine engineering around the principle of "safety, environmental protection, creating value for customers and society". They introduced the inspection and evaluation services of entire marine engineering, the service concept for the entire life cycle of the offshore facilities, and highlighted CCS offshore wind power, marine environmental database and application, risk-based inspection of offshore facilities, and other service products.

China Shipbuilding Industry Corporation (CSIC)

With the development of offshore oil and gas exploration in China, the implementation of "One Belt and One Road" and the increasingly energy cooperation between China and Russia, the development of offshore oil and gas become the focus of industry experts. At cippe2019, both domestic and foreign maritime companies, led by CSIC, exhibited with the latest equipment.

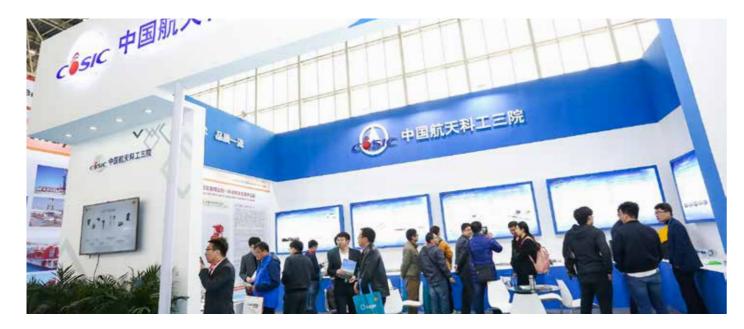

Jereh Group has participated in cippe for 13 consecutive years. At this Exhibition, Jereh Group launched a series of solutions called "Efficiency Improvement with Technology, and Intelligent Manufacturing with Concentrated Attention", and demonstrated the most cutting-edge scientific and technological achievements in the fields of quality and efficiency improvement, intelligent manufacturing, oilfield environmental protection, etc. The highlight products displayed include electric fracturing skids and intelligent manufacturing workshops. Among them, Jereh Hogwarts interactive walls also attracted the attention of visitors, which show the layout of the entire industry chain, including Jereh's oilfield equipment, natural gas boosting and treatment, oil and gas field ground engineering, distribution of energy, soil remediation and sewage treatment.

KERUI 科瑞石油

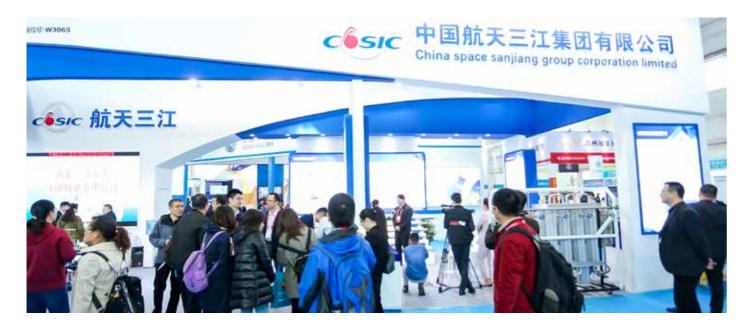

At cippe2019, KERUI Petroleum demonstrated the high-end oil and gas equipment, such as high-end wellhead equipment and oil and gas stimulation equipment through high-end presentation, VR experience interaction, holographic projection and other digital display, and exhibited marine electric explosion-proof liquid nitrogen pump skids to achieve the first domestic breakthrough in liquid nitrogen gasification so as to fill the domestic blank, and also exhibited wellhead gas booster screw machines, digital oilfield services, digital EPC project management, etc.

Research Institute of the Third Research Academy of China Aerospace Science and Industry

As a strategic, high-tech and national-level innovative enterprise, China Aerospace Science & Industry Corp mainly engages in five major industrial segments: defense equipment, aerospace industry, information technology, equipment manufacturing and modern service industry. It has strong core competitiveness and social influence. After many years of development, cippe not only covers the entire industry chain of the petroleum and petrochemical industry, but also linked to the petroleum-related industries, such as, aerospace, military industry, shipping, electric power, coal, maritime affairs and other related fields

Sanjiang Group of China Aerospace Science & COSIC Industry Corp

Sanjiang Group of China Aerospace Science & Industry Corp (The Fourth Research Institute of CASIC, Transportation Technology Research Institute of CASIC, referred to as "Aerospace Sanjiang") was completed in December, 2011 by merging and recombining Former Fourth Institute of Aerospace Science & Industry and Former Ninth Institute of Aerospace Science & Industry. Affiliated to China Aerospace Science & Industry Corp, it is the main unit of China's solid-state launch vehicle development and production, the backbone of the national defense technology industry, and production of special off-road vehicle and chassis.

SANY

SANY Group Co., Ltd. was founded in 1989. Since its establishment, SANY has always adhered to the vision of "establishing first-class enterprises, bringing up first-class talents and making first-class contributions" and created a well-known "SANY" brand. SANY Group mainly engages in the equipment manufacturing industry with the theme of "engineering". Its leading products are a full range of products including concrete machinery, excavation machinery, lifting machinery, road construction machinery, piling machinery, wind power equipment, port machinery, petroleum equipment, coal equipment, and precision machine tools. Among them, the excavation machinery, the piling machinery, the crawler crane machinery, the mobile port machinery, the road machinery, and the coal driving machinery are main brands in China and the concrete machinery is a global brand.

CATERPILLAR

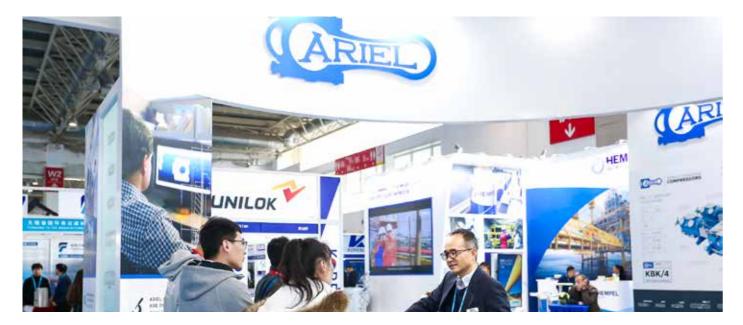

At cippe2019, CATERPILLAR Oil & Gas Business Division has brought its latest innovation power solutions to the exhibition, which are designed for customers in the Asian-Pacific region and offered a relatively wide range to meet the demand of China petroleum and nature gas market. The exhibits displayed include fracturing power assembly, electronic monitoring system of fracturing pump, onshore electric drilling generator set, etc.

30 | Post Show Report Post Show Report | 31

China Oil HBP Group is as an international service provider that provides comprehensive solutions for the development and utilization of oil and gas resources. It is committed to providing efficient and clean energy and energy production methods to customers around the world. The company mainly engages in three major segments: oil and gas equipment and engineering, petrochemical environmental protection equipment and services, and oil and gas development and utilization.

Ariel Corporation is the world's largest manufacturer of reciprocating natural gas compressors, mainly producing split-type reciprocating gas compressors. Ariel is committed to producing compressors that run longer and require less maintenance - providing maximum reliability in field operation.

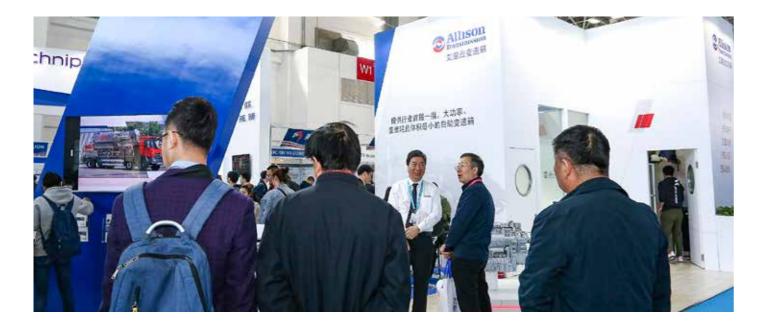

National Oilwell Varco is the world's largest manufacturer of drilling equipment and produces large mechanical components for onshore and offshore drilling rigs, complete onshore drilling rigs and workover rigs, pipe inspection and pipe coating equipment, string drilling equipment, multiple lifting equipment and various downhole motors, drill bits and tools.

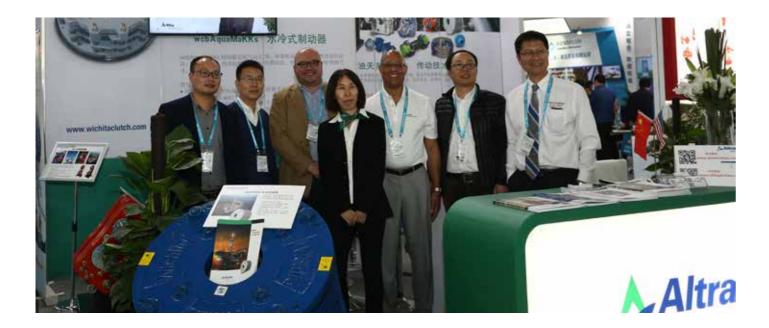

MTU is a supplier of land, water and railway propulsion systems and power generation engines. MTU has a worldwide reputation for its leading technologies, high reliability products and first-class after-sales services. MTU has always been known for its high output power, high efficiency, small size and durability. In the past, with the high price, most of MTU's products are only used in warships, tanks, nuclear power, transport ships, railway locomotives and other key areas.

Allison Transmission Corporation is world's largest manufacturer of commercial automatic transmissions and hybrid power systems. Our products are used for supporting the world's leading vehicles of more than 300 vehicle manufacturers, and are widely used in passenger cars, garbage trucks, emergency rescue vehicles, construction vehicles, logistic vehicles, and the like. Allison was founded in 1915 and headquartered in Indianapolis, Indiana.

Altra is world's leading designer and manufacturer of motion control and power transmission solutions. Altra products use engineering components and systems to provide basic control of equipment speed, torque, positioning and other functions, and can be used in virtually any machine, process or application involving motion. From precision motors embedded in medical robots to heavy-duty brakes used in rugged mining applications, Altra has been solving complex customer challenges around the world for decades.

Headquartered in Downers Grove, Illinois, Dover is a diversified global manufacturer with an annual income of approximately \$7 billion. We offer innovative equipment and components, professional systems, consumables, software, digital solutions and support services through three operation divisions: engineering systems, fluid and refrigeration and food equipment. Dover combines the global scale with operation flexibility to lead the market we serve.

SOLCO PYROELEC offers the highest-quality solutions of the industrial tracking heating and leakage detection system for various hazardous environment. With a strategic alliance with European customers in Russia, Britain, France and Spain, SOLCO PYROELEC has a valuable global market network.

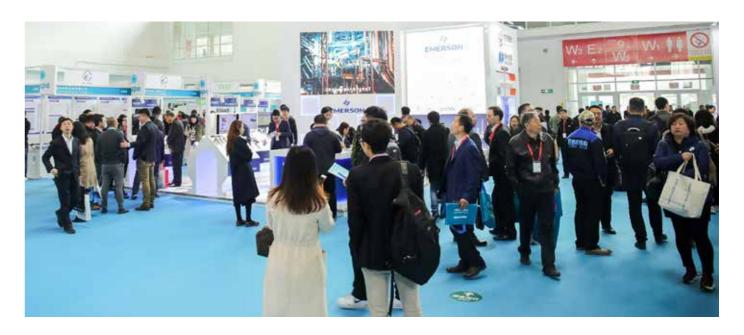

ROSO 阿奥艾斯海洋工程(上海)有限公司 ROS OFFSHORE (SHANGHAI) LTD.

ROSO Offshore (Shanghai) LTD. is committed to providing customer-satisfied value-added services and solutions for the shipping and marine industries. The company specializes in process design, project management, procurement, assembly integration and after-sales service of oil and gas process equipment skids and modules. ROSO Offshore (Shanghai) LTD. cooperates with Owners, Contractors, and Engineering Consulting Companies, and works with world-class domestic and foreign companies to provide advanced professional skills so as to solve the complex design of process equipment systems for customers.

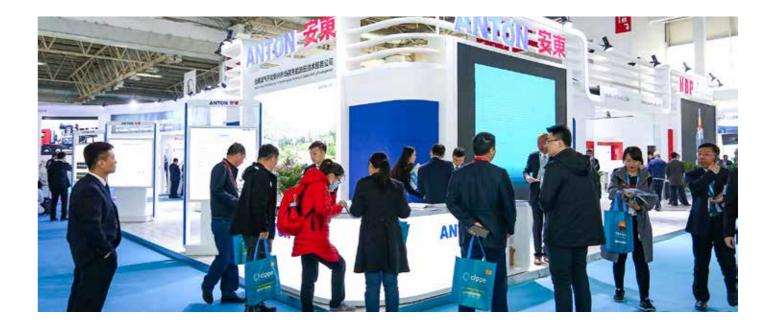

AkzoNobel is committed to building livable space with the highest quality coatings, to achieve excellence. Since 1792, our coatings and paints had inherited from the ingenuity and set the standard for color and protection. Our world-class brands include Dulux, International, Sikkens and Interpon, which are trusted by customers around the world. Our headquarter located in Netherlands and we have operations in more than 150 countries and employ approximately 34,500 talents who are passionate about offering the high performance products and services expected by our customers.

EMERSON has the courage to complete the transformation, to create the value for our customers and shareholders. With two new and energetic focus businesses, automation solutions and commercial & residential solutions, we are taking powerful advantage of coping with the increasingly complex and unpredictable market challenges. We will continue to increase our short-term and long-term value and continue to be a trusted partner in the engineering, industrial, commercial and residential markets.

ANTON 安東

Anton Oilfield Technology Group is the world's leading integrated oilfield technology service company with major operations in oil and gas producing regions around the world, and provides a full range of oil and gas development products and technologies for customers. It is an innovative company combined with geological engineering, production increasing, cost reduction and integration. Anton is committed to the depth development of emerging markets for global oil and gas, and has operations in more than 30 countries and regions, which include China, Middle East, Africa, Central Asia, Southeast Asia and Latin America, forming a global rapid-response service support system.

36 | Post Show Report Post Show Report | 37

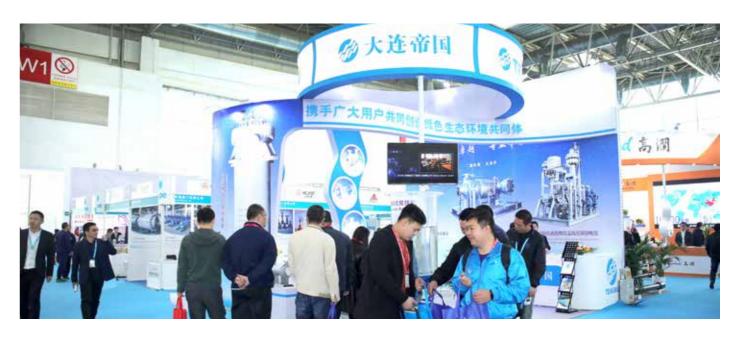

As an important steel industry base in China, BAOGANG GROUP (hereinafter referred to as BAOGANG), found in 1954, is world's largest rare earth industry base and an industry leading enterprise in Inner Mongolia Autonomous Region. It owns two listed companies: BAOGANG Stock" and Northern Rare Earth". By the end of 2015, BAOGANG GROUP has the total assets more than 160 billion RMB. Baiyuneboite, belonging to Baogang Steel, is an exceptionally rare polymetallic symbiotic mine that includes 175 types of minerals and 71 types of elements, among which the reserve of rare earths ranks first and the niobium ranks second in the world.

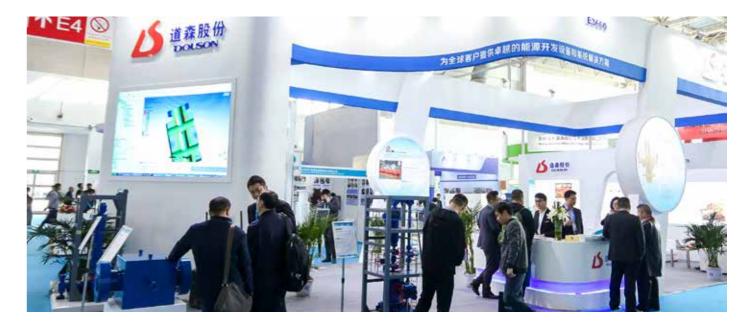

Founded in 1956, Yantai MOON is a large-scale, cross-industry and international operation group enterprise. Its main businesses include the low-temperature refrigeration, central air conditioning, environmental protection heating, sealing technology, precision casting, energy and chemical industry equipment. The core enterprise of Yantai MOON, namely Yantai MOON-TECH Co., Ltd., was listed on Shenzhen Stock Exchange in 1998 ("Yantai Moon Stock Co., Ltd." was renamed as "MOON-TECH Co., Ltd." on September 25, 2017).

Dalian Teikoku Canned Motor Pump Co., Ltd. is a wholly-owned branch of TEIKOKU ELECTRIC MFG. CO.,LTD. Teikoku headquartered in Japan and founded in 1939, is the world's largest canned motor pump manufacturer. It has established three production bases in Japan, the United States and China. It has a worldwide sales network. The company was established as a joint-ventured company in Lyshunkou District of Dalian on September 19, 1994, which became the first international professional canned motor pump manufacturer and opened a new era in the canned motor pump industry in China.

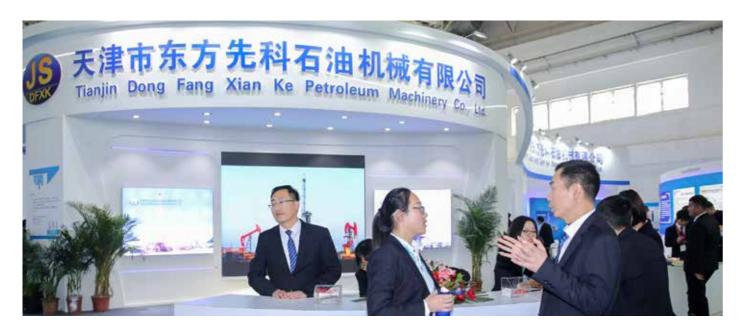

DOUSON is a new high-tech enterprise and mainly engages in research, development and manufacturing of oil and gas drilling wellhead devices, valves and well control equipment. It has obtained API Q1 and related API Product Certificates. The Main products include wellhead devices, oil (gas) Christmas trees, pipeline valves, well-control equipment and top drive spindles. The products have the highest technical level and quality in the petroleum machinery industry in China and have obtained PR2 Certificate and TS Special Equipment Manufacturing License.

KARCHER

Kärcher is the world's leading cleaning technology supplier and has the high-pressure and ultra-high-pressure cleaner, vacuum and steam cleaner, sweeper, car washing system, cleaning agent, dry ice cleaner, drinking water and waste water treatment plant, water dispenser, water pump and home and garden water supply system, providing a series of innovative solutions, which include compatible products and accessories, recommendations, services and numerous digital solutions for the customers.

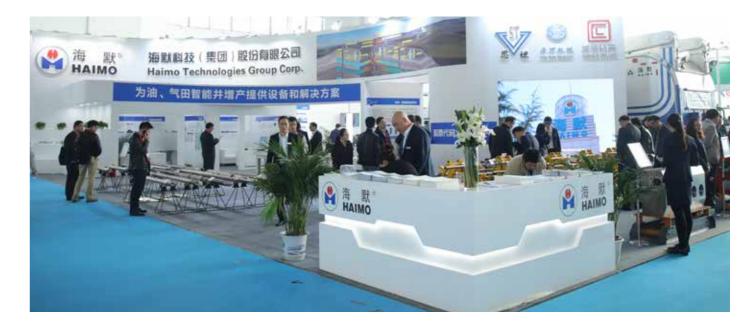

Found in 2004, Tianjin Dongfang Xianke Petroleum Machinery Co., Ltd., with the registered capital of 350 million RMB, covers an area of more than 800 acres and the construction area of 286,000 square meters, the production area of 255,000 square meters. There are more than 1,500 employees. It is the most important petroleum machinery manufacturer in the petroleum construction industry chain of Northern China, the leading enterprise of Tianjin Science and Technology Little Giant, the national high-tech enterprise, the key high-tech enterprise of the National Torch Plans, and the first domestic private enterprise with Production Qualification of Special Vehicle Chassis.

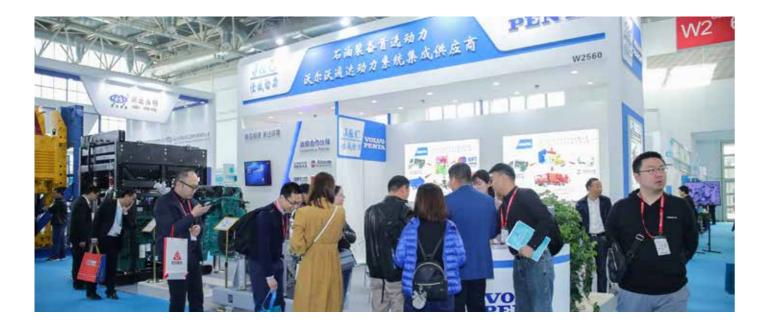

Founded in 1915, HEMPEL Group headquartered in Copenhagen, Denmark. It is a world-famous manufacturer and supplier of marine paint, industrial paint, container paint, decorative paint and yacht paint. It has 28 manufacturers, 15 research and development centers and more than 50 sales offices around the world. With more than 150 inventory points in more than 80 countries an regions, the global sales and service organizations of HEMPEL Group provide professional services at all stages for the customer's coating project.

HAIMO Technologies (Group) Co., Ltd. (hereinafter referred to as the company) is a multinational company engaging in oilfield equipment manufacturing, oilfield technology service, exploration and development of unconventional oil and gas. The company was founded in 1994. In 2000, it completed the overall change and established a limited liability company. In May, 2010, it was successfully listed on the GEM of Shenzhen Stock Exchange (HAIMO Technologies, and stock code: 300084).

VOLVO PENTA

Wuhan Gaoke Jiacheng Power Technology Co., Ltd. is a VOLVO multi-purpose industrial engine OEM agent officially authorized by VOLVO PENTA of Sweden. It takes the "power technology" as its core and its operations cover new energy, power, environmental protection, and the like. Based on the principle of "The specialists do the professional things", Jiacheng Power is committed to providing design, system integration and whole personalized service of high-quality and complete-system VOLVO diesel engine power assembly for customers.

As a global oilfield product company, Forum Energy Technologies (FET) serve the subsea, well drilling, well completion, production and infrastructure fields of the oil and gas industry. The company's products include highly engineered fixed equipment and products applied to well drilling, shaft construction, oil and gas production and transportation. Forum Headquarters located in Houston, Texas and its manufacturing and distribution branches spread all over the world.

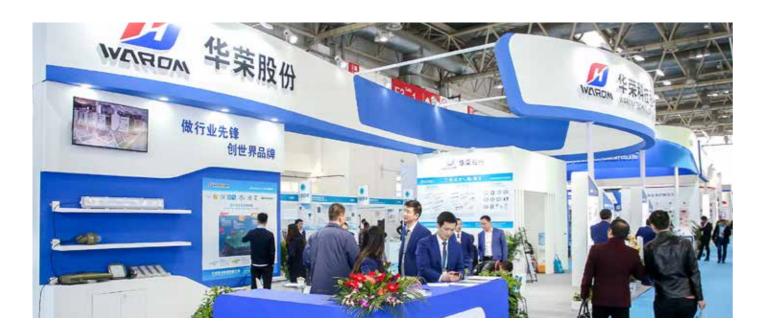

Beijing HTWB Petroleum Technology Co., Ltd. and its wholly-owned branch (Yantai Hengtai Oilfield Technology Development Co., Ltd.) are committed to the all-round development and technical services of related operations of directional wells; Our company has a domestically authoritative technology research and development team, focusing on the production of MWD, LWD, resistivity, and other wireless logging-while-drilling inclinometers with independent intellectual property rights. Our pursuit and goal are always to provide safe, efficient and super-stability products and first-class after-sale guarantee for customers.

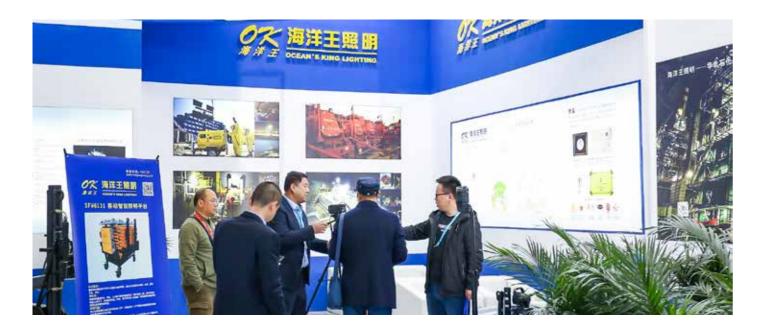

HONGHUA GROUP is the only overseas-listed company of China Aerospace Science & Industry Corp, and is positioned as the main platform for energy equipment development of CASIC. As one of the world's leading onshore drilling equipment manufacturers and onshore rig exporters in China, Honghua Group is principally engaged in manufacturing traditional onshore drilling rigs, CNC drilling rigs, rig accessories, and parts of drilling rigs during operation or parts for repairing rigs.

WAROM Co., Ltd. is a domestic leading supplier of explosion-proof electric apparatus and professional lighting equipment. It is mainly engaged in research and development, production and marketing of the explosion-proof electric apparatus and the professional lighting. The company is the executive director unit of China Electrical Equipment Industrial Association, the president unit of the explosion-proof electrical branch of China Electrical Equipment Industrial Association, and the vice president unit of SIEATA. On May 24th, 2017, the company successfully listed A shares of Shanghai Stock Exchange (WAROM shares, stock code: 603855).

As a leading private enterprise of the industry, Ocean's King Lighting Science & Technology Co., Ltd. (OKTECH) takes integration of research and development, production and marketing of professional lighting equipment for special environment as the main business. The company has accumulated a large number of advanced technologies and development experience in domestic professional lighting for special environment, and has strong competitive advantages in product development and marketing channels. The products include three series of fixed lighting equipment, mobile lighting and portable lighting equipment. The company has the mature lighting solutions and the after-sales support service system to maximize value for customers.

SESAIJIALIJIA (Beijing) Petrochemical Equipment Co., Ltd. was established in 1996 and established a joint venture with SESAIJIALIJIA (HK) In 2009. It mainly engaged in research, design, manufacturing and marketing of petrochemical equipment. As a new high-tech enterprise (Beijing), the company built a fuel dispenser evaluation laboratory, a fuel dispenser OIML laboratory and a fuel dispenser environment laboratory together with Beijing Institute of Metrology. It has a total assets over 100 million RMB, more than 200 employees and over 10,000 square meters factory area.

Found in 1998, Beijing JERRYWON Company has a registered capital of 150 million RMB Yuan and more than 400 employees. The company, specializing in the energy and focusing on the natural gas industry, is a comprehensive enterprise that takes compressor skids, technical services and petroleum engineering technology service as its core business. JERRYWON is committed to developing the overall technical service capacity of the middle and lower streams of the natural gas industry. It is an important supplier and technical service provider of natural gas compressors and its petroleum engineering business is in the leading position in the industry.

GANERGY HEAVY INDUSTRY GROUP CO., LTD., is a leading large-scale oil drilling equipment manufacturer in China. It is a long-term strategic partner of CNPC, Sinopec, CNOOC and Yanchang Petroleum (Group) Co., Ltd, and a national petroleum industry torch base. The company is integrated with oil and gas equipment manufacturing, energy development, oilfield operation and financial service. The group has a number of branches, including equipment manufacturing, engineering technology service, finance, technology, and international business.

In 2004, Continental Corporation has developed as the world's largest enterprise in the non-tire rubber industry. In particular, our company has written a new page in the success history of China market: We have provided decades of products to the Chinese and Asian markets, with a considerable number of production bases. In 2008, Continental Corporation maintained sustainable development, to provide interiors, drive belts, fluid technologies, suspension and other solutions for future automotive development.

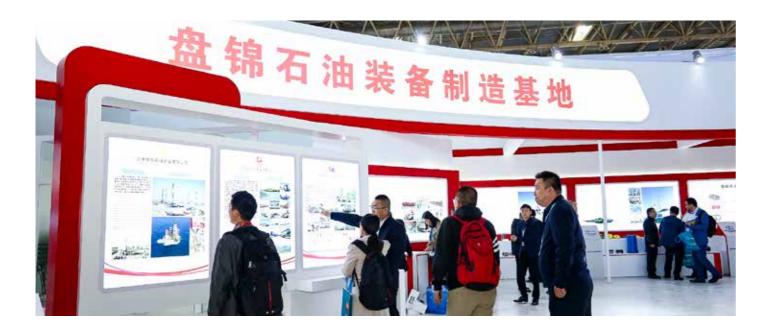

LANZHOU LS HEAT EXCHANGE EQUIPMENT CO., LTD. is a branch of LS Group, specializing in research and development, design, production and service of plate heat exchangers. It is also one of the units that draft out GB16409-1996 "Plate Heat Exchangers", GB28158-2011 "Urban Heat Exchanger Units", and CJ/T191-2004 "Heat Exchanger Units" with the industry standard issued by the Ministry of Construction. Achieving first-class product quality through the innovation, efficiency, harmony and first class. Namely, cultivating employees' innovation capability, pursuing efficient working efficiency, advocating the spirit of solidarity and cooperation.

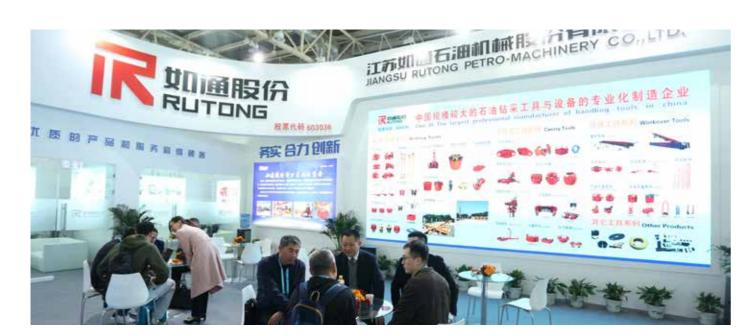

Rockwell Automation (NYSE: ROK) is one of the world's largest automation and information companies, and is committed to helping customers increase productivity and the world's sustainable development. Rockwell Automation, together with 11 domestic authorized distributors, more than 50 approved system integrators, 40 Encompass strategic partners and global strategic alliances, provides a wide range of world-class products, solutions and services for manufacturing companies.

Panjin Petroleum Equipment Manufacturing Base

Panjin Petroleum Equipment Manufacturing Base, located in Panjin Economic Development Zone, has been confirmed as one of the major petroleum equipment manufacturing bases by CNPC and is an important part of Liaoning Province equipment manufacturing base. The whole base is divided into eight specialized areas: drilling equipment area, oil equipment area, petroleum pipe area, oil and gas field environment-friendly area, refining equipment manufacturing area, oilfield engineering technology enterprise area, new energy equipment manufacturing area and research and development area.

Jiangsu Rutong Petro-Machinery Co., LTD.,(Former Jiangsu Rudong General Machinery Co., Ltd.) was restructured into a limited liability company in December 2011. It was listed in Shanghai Stock Exchange on December 9, 2016! The company is one of the earliest domestic enterprises engaging in research and development, manufacturing and marketing of oil drilling and wellhead equipment. After decades of development, it has become the "Top 50" in the petroleum and petrochemical equipment manufacturing industry in China and the new high-tech enterprise in Jiangsu.

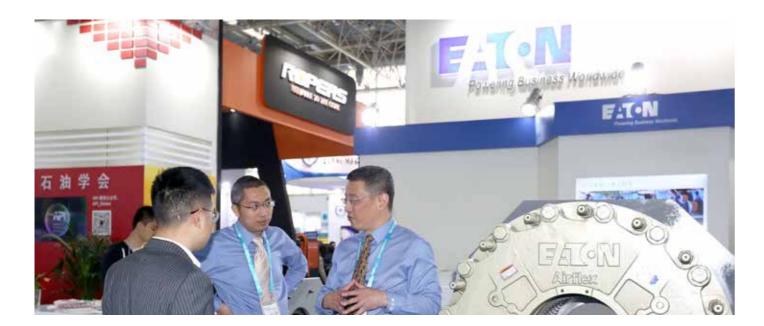

SHENKAI is a listed company (Stock Code: 002278) and takes research and development, manufacturing of petrochemical equipment and engineering technology service as its main business. SHENKAI focuses on the petroleum and petrochemical industry and continues to create new value. After more than 20 years of development, the company has been one of the backbone enterprises of the petrochemical equipment manufacturing industry in China. Its products involve in oil exploration and development, refining and other fields and has a good reputation in petrochemical equipment industry.

Shenyang Blower Works Group is a pillar and strategic leading enterprise of the major technical equipment industry, with an area of 700,000 Sqm and 7,000 employees. It is responsible for providing domestic equipment for major engineering projects related to the national economy and people's livelihood, such as petroleum, chemical industry, air separation, electric power, metallurgy, environmental protection and national defense. Its development is related to national economic security and have been praised as the "National Treasure" by the official leaders. Over the years, Shenyang Blower Works Group has adhered to technical, management, talent system and cultural innovation, and continuously achieved new breakthroughs in localization of major equipment.

EATON conducts business in more than 175 countries and regions. Our high-efficiency products and services are helpful to customers to manage electrical, hydraulic and mechanical power more reliably, efficiently, safely and sustainably. It provides the tools for people, to use power more efficiently, and help the company conduct business more sustainably. All Eaton's employees are encouraged to come up with excellent opinions and suggestions for our business, community and the positive impact we can make on the world.

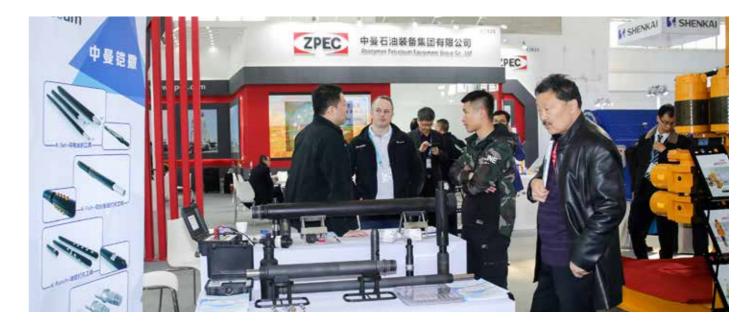

HIMOINSA is a global company integrated with design, manufacturing and distribution of power generation equipment. Its products include diesel and gas generator sets, lighting beacons and control panels, as well as hybrid generators and generator sets that are ready to be incorporated into solar power systems. HIMOINSA has established 11 branches and eight production centers around the world. It currently has 1,000 employees and works closely with more than 130 distributors worldwide.

Ingersoll Rand (NYSE: IR) comprehensively improves the living quality by creating comfortable, sustainable and efficient environment. Our employees and brands: Club Car®, Ingersoll Rand®, Thermo King® and Trane® work together to improve the air quality and comfort of residential houses and buildings, transport and protect food and perishables safely and increase productivity and efficiency in the industrial field. As a global company with the annual marketing turnover of more than 13 billion dollar, Ingersoll Rand is committed to building a world of continuous improvement and long-term evergreen.

Zhongman Petroleum and Natural Gas Group (referred to as ZPEC) headquartered in Industrial Area of Lingang New City, Pudong New District, Shanghai, with a registered capital of 400,000,100 RMB, is an oil and gas company aimed to be a multinational energy giant. It is the most powerful international drilling engineering contractor and the high-end petroleum equipment manufacturer, with the advantages of upstream and downstream integration in China.

UK Pavilion

UK is the largest crude oil producer in Europe and the largest producer and exporter of natural gas. UK has 5 billion barrels of proven crude oil reserves, almost all of which are located in the North Sea. Its major production area is the Eastern Scottish Basin, in the middle of the North Sea. The members of UK pavilion involve in downhole operations, special coatings, oil and gas pipeline applications, polymers, and transmission products.

Germany Pavilion

At cippe2019, German Mechanical Engineering Industry Association (VDMA) organized 42 petroleum equipment manufacturers. It is the largest delegation to participate in relevant exhibitions held in China so far, reflecting the importance of China when German companies expand their businesses and the core value of the Chinese market.

USA Pavilion

There were 116 US companies participated in cippe2019 in total, including 20 companies from USA Pavilion and 96 independent exhibitors, which covers oil and gas exploration, drilling and production technologies, natural gas technologies and other fields.

Canada Pavilion

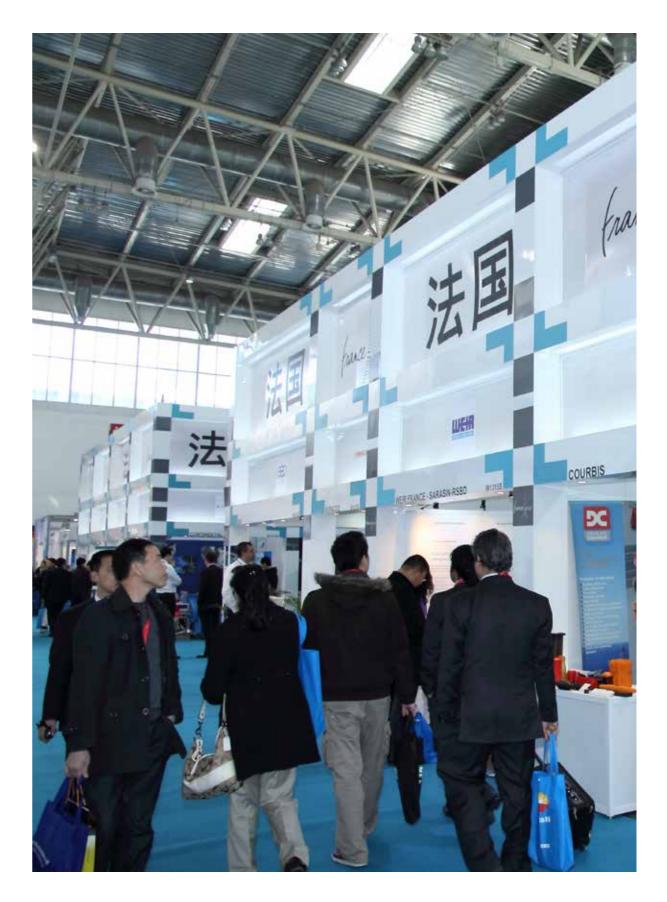

The Economic Development and Trade Department of Alberta Government, teamed up with Canadian Embassy in China and CNPC-Alberta Petroleum Centre, organized 12 Alberta companies to appear on cippe2019.

Italy Pavilion

Professional Visiting Groups (Partial)

CNPC

China National Petroleum Corporation (CNPC for short) is a comprehensive international energy company that takes oil and gas operations, engineering technology services, petroleum engineering construction, manufacturing of petroleum equipment and development of new energy as the main businesses. After 19 years of development, cippe, the Annual World Petroleum & Petrochemical Event, has attracted the attention and support of domestic and foreign oil giants. CNPC attaches great importance to this Event and organizes branches to visit the exhibition each year. These include Engineering Technology Branch, Engineering Construction Company, Materials Company, Great Wall Drilling Company, Exploration and Development Company, Natural Gas Pipeline Company, Geophysical Exploration Company, Exploration and Development Research Institute, Drilling Engineering Technology Research Institute, etc.

- 1. CNPC Bohai Drilling Engineering Co., Ltd. organized 30 people, including Directors, Department Managers and Senior Engineers from Science and Technology Development, Equipment and Technology Department, to visit the exhibition.
- 2. Six Directors from CNPC Bohai Drilling Engineering Technology Research Institute, and 35 Department Managers and Senior Engineers from Science and Technology Development Department, Intelligent Drilling Research Institute, Fracturing Center, Cementing Center, etc, came to visit ciope2019.
- 3. Supervisor Mr. He, from Dagang Oilfield Group Co., Ltd. of China Petroleum and Natural Gas Co., Ltd., organized the company leaders and 200 people from nearly 30 departments of more than 10 branches, such as downhole operation company, oilfield chemistry institute, water injection technology institute, electrical automation institute, ground technology institute, inspection and supervision evaluation center, Jian'an subsidiary, machine construction subsidiary, electric instrument subsidiary, anti-corrosion civil engineering subsidiary, oil production institute, oil production plant, and Zhaodong operation subsidiary to visit the exhibition.
- 4. The Director and the Chief Engineer, from Dagang Oilfield Petroleum Engineering Research Institute, led 30 Project Managers in the company to visit the exhibition.
- 5.General Manager and Chief Engineer, from CNPC Dagang Zhaodong Operation Branch, led colleagues from Procurement Department, Base Warehouse, Legal Department and other departments to visit the exhibition
- 6. More than 20 people, including Chief Engineer, Vice Chief Engineer, Department Manager, Director and the like, from Drilling Technology Service Branch of CNPC Bohai Drilling Engineering Co., Ltd., attended the exhibition.
- 7. 20 Senior Engineers, from Technical Research and Development Center of Downhole Technical Service Branch of Bohai Drilling Engineering Co., Ltd., came to visit and study the exhibition.
- 8. 16 Department Managers and Members,

from Bohai Drilling International Engineering Company, attended the exhibition.

- 9. Department Manager Mr. Guo, from Science and Technology Information Division of First Logging Company of Bohai Drilling, organized 16 people from Logging Company of Dema Instrument Manufacturing Center, Dema Information Service Center, Equipment Material Management Center, Engineering Technology Section and the like to visit the exhibition.
- 10. 35 people, from Instrument Operation Department, Material Equipment Division, Instrument R&D and Manufacturing Center, Directional Well Operation Department and the like of Bohai Drilling Directional Well Company, attended cippe2019.
- 11. 27 people, including institute director, factory director, technical backbone and the like from the research institute, and the departments of production, management, industrial pump, cable, drilling tool, electric pump and drilling bit of Zhongcheng Machinery Manufacturing Co., Ltd. of Bohai Petroleum Equipment (Tianjin), visited the exhibition.
- 12. Bohai Drilling Oil and Gas Well Testing Branch, organized by Science and Technology Information Division and led by many company leaders, constituted a 122-member visiting group, including

- Science and Technology Information Division, Repair and Maintenance Center, Engineering Technology Division, Research and Development Promotion Center, Trial Production Project Department. Evaluation and Interpretation Center, Well Testing and Logging Project Department, Safety and Environmental Protection and Energy Conservation Department, Safety Supervision Station, International Project Manager Department, Market and Production Coordination Department. Testing Project Department, Editing Department, and Changqing Project Department, to visit the exhibition on 27th March. The purpose of visiting was to seek innovative technology and collect market
- 13. China Petroleum Pipeline Materials & Equipment Co., Ltd., committed to building an internationally competitive pipeline engineering material procurement and logistics service company, takes pipeline engineering project procurement and logistics services as the core, and provides pre-procurement planning, electronic procurement implementation, supervised manufacturing to intelligent logistics, warehousing, material import and export trade, customs clearance, post-service guarantee and other "one-stop" material supply services for domestic and foreign customers.

China Petroleum Pipeline Material & Equipment Corporation

66 I Post Show Report 67

Sinoped

More than a thousand of professional visitors, from Sinopec Group and its branches, such as International Petroleum Exploration and Development Corporation, International Petroleum Engineering Company, Petroleum Exploration and Development Research Institute, Shengli Petroleum Engineering Technology Research Institute, Shengli Oil Production Plant, Beijing Aoda Branch of Catalyst Co., Ltd., Petroleum Engineering Design Co., Ltd., Yanshan Petrochemical Company, Petroleum Engineering Technology Research Institute, and the like attended cippe2019.

- 1. Sinopec Yanshan Petrochemical Company was established in 1970. It is one of the earliest and largest modern petrochemical joint ventures in China. The company's leaders valued cippe Beijing Petroleum Exhibition very much. They have organized visits for many years. This year, they specially organized nearly 100 persons from Research and Technology Department, Mechanical Power Department, Scientific Research Management Section of Hightech Company, and Electromechanical Instrument Department of Education and Training Center to visit and exchange opinions.
- 2. The Fourth Petroleum Machinery Company of Sinopec, established in 1941. has a long history of over 70 years. The company adheres to the conduct code of "Those who make some effort to do something will succeed and those who move tirelessly may achieve the goals" and makes efforts to establish a "well-known brand" with strong international competitiveness. This year, the company still organizes 50 elite representatives from Science and Technology Management Department, Drilling Institute and other departments to visit the exhibition, exchange the ideas, promote relationships and seek new cooperation.
- 3. Nearly 1,000 people from Materials and Equipment Department (International Business Company) of Sinopec, International Exploration and Development Corporation Petroleum Engineering Technology Research Institute, Petroleum Exploration and Development Research Institute, Sinopec Petroleum Engineering Construction Co., Ltd., Petroleum Engineering Design Co., Ltd., Petroleum Engineering Technology Service Co., Ltd., Yanshan Branch, Shengli Oilfield Subsidiary, Petroleum Machinery Co., Ltd. of Fourth Machinery Factory, Winfield Company of National Exploration Company, and the like visited the exhibition
- 4. Petroleum Exploration and Development Company is a wholly-owned branch established by Sinonec Corporation in 2002. It undertakes the strategic mission of Sinopec Group petroleum business to extend upstream. It is committed to conducting oil exploration and development business at home and abroad. They paid more attention to the international exhibitors at cippe2019. The company has been organizing groups to visit exhibitions for many years. This year, the department of Technology Innovation, Brazilian Project Company, and Oil and Gas Innovation and Development Department sent people to visit the exhibition.
- 5. Drilling Technology Research Institute of Sinopec Shengli Petroleum Engineering Co., Ltd. organized 71 persons including leading experts of drilling institutes, and leaders and engineers of drilling stations, tooling

The Fourth Petroleum Machinery Company of Sinopec Delegation

Sinopec Yanshan Petrochemical Company Delegation

stations, Oilation institute, marine institutes, and well completion institutes to visit the exhibition. This year, the company focuses on drilling.

- 6. Sinopec Petroleum Exploration & Development Research Institute includes Sinopec Petroleum Exploration and Development Technology R&D and Integration Department, Oil and Gas Exploration and Development Technology Support and Service Department, Upstream Development Strategy and Oil and Gas Exploration and Development Planning Department, and Sinopec Upstream Geological Material Information Center. The company has visited the exhibition for many years, and organized more than 50 colleagues to visit cippe this year.
- 7. The leaders of Sinopec Petroleum Engineering Construction Co., Ltd., led experts and supervisors from Technical Quality Department, Production Operation Department, Market Development Department and others to visit cippe2019.
- 8. This year, Shengli Oilfield Petroleum Engineering Technology Research Institute

- organized 56 persons from more than 10 departments to visit the exhibition. It mainly visited well-known enterprises at home and abroad to conduct cooperation and exchange
- 9. Shengcai Factory of Shengli Oilfield has been consecutively invited to the exhibition for several years. This year, the experts, section managers and section members from Shengli Oilfield have visited cippe Beijing Petroleum Exhibition.
- 10. Sinopec Group (Materials and Equipment Division) has been consecutively invited to the exhibition for more than ten years. This year, the company payed special attention to cippe. The company organized more than 60 persons including senior leaders, experts and engineers to visit the Exhibition and attended the procurement matchmaking meeting.
- 11. General Manager, Managers, Chief Engineer, tens of department heads, and more than 100 employees, from Sinopec Oilfield Service Corporation, visited the exhibition. This year, they visit Sinopec Pavilion and some other exhibitors' booths.

China National Offshore Oil Corporation (CNOOC) is the largest offshore oil and gas producer in China. Organized by the department of Science and Technology, CNOOC Research Institute, Offshore Oil Engineering Co., Ltd., CNOOC Energy Development Engineering Corporation, Tianjin Branch of CNOOC, CNOOC Energy Development Equipment Technology Co., Ltd., Pipeline Engineering Company of CNOOC Energy Technology & Services Limited, CNOOC Bohai Petroleum Hydropower Service Company, Sino-French Bohai Geological Service Co., Ltd. and other branches visited cippe2019.

- 1. Drilling Division of CPOE organized more than 50 engineers to visit cippe2019, focusing on upstream equipment.
- 2. More than 20 directors, from Project Group, Offshore Engineering Department, Oilfield Technology Department, Business Law and Regulation Department, Integrated Management Department and the like of Tianjin Branch of CNOOC Energy Development Co., Ltd., attended the exhibition.
- 3. Offshore Oil Engineering Company organized 80 people from six branches, including installation, maintenance, construction, international, design and special equipment company. They are from tens of departments including technical, construction operation, science and technology information, procurement center, business contract office, pipeline engineering, diving operation, maintenance engineering, project management center, and oilfield disposal engineering department, to visit the exhibition.
- 4. 16 Senior Engineers from CNOOC Engineering Design Institute, Technology R&D Center, Process Safety Design Institute, Electrical Design Research Institute of Electromechanical Institute, Floating Body Institute, and International Design Department visited the exhibition.
- 5. Science and Technology Management Department of Oilfield Technology Division of China Oilfield Services Limited continued to organize 233 persons, including General Managers, Vice General Managers and Secretary of Party Committee from Operation Safety and Environmental Protection Department, Oilfield Technology Research Institute, Manufacturing Center, Data Interpretation Center, Marketing Department and other departments, to visit the exhibition.
- 6. More than 20 people from Equipment Department, Science and Technology Department, Marketing Department, and Operation Department of COSL-EXPRO Testing Services (Tianjin) Co.,Ltd., visited the exhibition.
- 7. Oil Production Service Branch Science and Technology Information Department of CNOOC Energy Technology & Services Limited organized more than 30 people from North Corporation, Oil Production Facility Research Institute, International Department, Caofeidian FPSO Operation Company, Technology Center and other departments, visited the exhibition
- 8. More than 50 people, including

- principals and engineers from CNOOC Energy Development Pipeline Engineering Company, Pipeline Institute, Installation Company, Coating Branch, Drilling and Production Branch, came to visit the exhibition.
- 9. Supervisor Xing, from Science and Technology Management Department of NOOC Research Institute, organized 120 persons from Exploration Research Institute, Development Research Institute, Drilling and Production Research Institute, Engineering Research and Design Institute, Technology R&D Center, New Energy Research Center, Science and Technology Management Department and other departments visited the exhibition.
- 10.General Manager and Vice General Manager of Offshore Oil-ODIS Well Completion Service Co., Ltd. led a total of 13 principals from all departments of the company to attend the exhibition.
- 11. Business Service Department of Tianjin Branch of China Oilfield Services Limited organized 137 persons from Geophysical Exploration Department, Research and Development Center, Production Research Institute, Well Completion Center, Production Increase Center, Operation Marketing Department, Administration and Management Department, and the like, to visit and survey cippe2019.
- 12. Industrial Cleaning Technology Service Center of CNOOC Energy Development of Equipment and Technology Co., Ltd. organized 33 persons from Technology Center, Facility Improvement Operation

- Department, Oil Pipe Service Operation Department, Corrosion Treatment Operation Department, Production Operation Department and Cleaning Operation Department, to attend cippe2019.
- 13. More than 70 people from nearly 10 branches and centers, such as CNOOC Energy Development of Equipment and Technology Co., Ltd., Tianjin Branch, Equipment Company, Testing Center, Processing and Manufacturing Branch, R&D Center, Module Drilling Project Team, and Electromechanical Center visited the exhibition.
- 14. Ten people, including Manager and Vice Manager from Zhanjiang Branch of CNOOC (China) Co., Ltd., Production Department and Operation Company, visited the exhibition.
- 15. 60 persons from CNOOC Energy Development Pipeline Company, Pipeline Institute, Installation Company, Coating Branch, Drilling and Production Branch, and Disposal Company of New Industrial Facilities visited the exhibition.
- 16. 37 people from Tianjin Branch of CNOOC (China) Co., Ltd., Science and Technology and Information Technology Department, Boxi Operation Company, Bonan Operation Company, Qinhuangdao 32-6/Bozhong Operation Company, Liaodong Operation Company, Engineering Construction Center, Procurement and Sharing Center, Production Department of Engineering Technology Operation Center, and other departments visited cippe2019.

Tianjin Branch of CNOOC

Others

cippe is the popular vane of petroleum industry. Since 2012, the exhibition not only covers the entire industrial chain of the petroleum and petrochemical, but also expands gradually to the related industries, such as aerospace, aviation, coal, military industry and electric power.

- 1. HEBEI NEW TIEHU PETROLEUM MACHINERY CO., LTD, led by Director Gao Yuan, constituted a visiting group including 47 backbone elites from Technology Department, to visit cippe exhibition again.
- 2. Equipment Integration Branch of Xindi Energy Engineering Technology Co., Ltd. of ENN Group first visited the exhibition with a group of 35 colleagues in 2019.
- 3. Beijing Aerospace Petrochemical Technology & Equipment Engineering Corp., Ltd organized colleagues from seven departments to visit the exhibition. They focused on petrochemical and intelligent equipment and
- 4. CITIC Petroleum first organized 19 colleagues from Technology Department to visit the exhibition in a visiting group.
- 5. International R & D Center of Aramco Far East (Beijing) Business Service Co., Ltd. visited the exhibition in a group of 12 visitors.
- $\hbox{6. Aerospace Junhe Technology Co., Ltd., as a wholly-owned branch}\\$ of 18th Institute of CASC, actively participated in cippe of Zhenwei Exhibitions. This year, 30 persons are still organized to visit the exhibition so as to cooperate with the rotary steering companies.
- 7. Beijing Petrochemical Engineering Co., Ltd. has been paying close attention to cippe in recent years. This year, the equipment department, the chemical process room, the control room and the like visited the
- 8. Special Service Research Institute of Naval Research Institute continued to organize the visitors this year, focusing on cooperating with the chemical companies.
- 9. More than ten persons from Design Department and Project Management Department of Beijing CNAF Engineering Construction Co., Ltd. visited the exhibition.
- 10. Representatives of Marketing Center, Technology Center and Production Center of CSIC Heavy Industry Motor Technology Co., Ltd. constituted the visiting group of 20 persons to visit the exhibition for five
- 11. More than ten people, including General Managers, Department Heads and Engineers from Dalian Chemical (Jiangsu) Co., Ltd., visited the exhibition.
- 12. Nearly 30 engineers and department Managers from Beijing General Research Institute of Mining and Metallurgy came to visit and study the exhibition
- 13. Standard Development Center of Comprehensive Technology and Economic Research Institute of China Shipbuilding Industry Corporation attended cippe for 9 consecutive years, and New discoveries are obtained at each exhibition.
- 14. More than 12 persons from Institute of Geology and Geophysics, Chinese Academy of Sciences visited petroleum drilling and logging equipment.
- 15. 15 people, including Associate Professors, Doctoral Students, Master Degree Candidate from the Ministry of Land and Resources of China Key Laboratory of Deep Geological Drilling in China University of Geosciences (Beijing) visited the exhibition.
- 16. Standard Development Center of Comprehensive Technology and Economic Research Institute of China Shipbuilding Industry attended the exhibition for 9 consecutive years, and the new discoveries are always obtained at each exhibition.
- 17. More than 10 people from the Institute of Geology and Geophysics of Chinese Academy of Sciences, visited petroleum drilling and logging equipment on site.

International

International buyers from ADNOC, Saudi Aramco, Pakistan State Oil, and Rosneft visited cippe and reached a preliminary purchase agreement with many manufacturers.

An international purchasing group composed of 17 international buyers from Yemen, India, Ghana, Malaysia, Canada, Pakistan, Bangladesh, Congo, Egypt, Ecuador, Costa Rica and other countries first visited cippe to discuss cooperation and purchase the relevant petroleum and petrochemical equipment. They attracts the attention of many Chinese companies that were interested in cooperating. After the exhibition, the members said that the journey of cippe was very fruitful and worthwhile and they will continue to participate in for the next year.

Concurrent Events ►

cippe International Petroleum Industry Leadership Meeting

As the Annual World Petroleum & Petrochemical Event, cippe has been a high-end platform for exchanging of new ideas, new technologies and new achievements of global petroleum industry. More than 500 guests, including government officials, industry leaders, exhibitor representatives, senior experts, and diplomatic envoys from home and abroad attended the communication.

The 11th International Petroleum & Natural Gas Summit

On March 27th, the 11th International Petroleum & Natural Gas Summit was grandly opened in Beijing New China International Exhibition Center. More than 500 people from home and abroad attended the conference. The Summit focused on the discussion around the theme of "Working Together and Creating the Future". Through the analysis of industry policies and the development prospects of the industry, the summit provided the latest information to the participants to explore the market further.

The Summit consists of Oil and Gas Exploration and Development Meeting and Intelligent Oil Field and Digital Factory Meeting. The topics centered on the petroleum industry development trend, the oil and gas exploration and development, the oil and gas engineering technology and equipment, and the natural gas ship.

As the thematic conference of cippe, the International Petroleum & Natural Gas Summit dedicated to serving the upstream, midstream and downstream industry chain, promoting international cooperation and cooperating with the national strategy. It aims to be a technology exchanging, idea sharing and achievement displaying platform for the petroleum industry.

Embassy (Oil and Gas) Promotion Conference

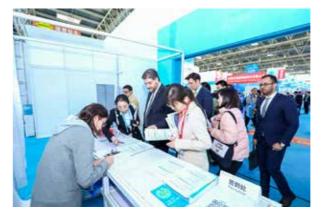

At cippe2019 Embassy (Oil and Gas) Promotion Conference, there are 11 international guests from Russia, Britain, Norway, Turkey, Malaysia, Greece, Azerbaijan, Bahrain, Afghanistan, Peru and other major oil producing countries and regions. They brought the latest overseas market trends and new opportunities for the participants. More than 300 representatives from Geological Exploration Technology Research Institute of China Geological Survey, China Petroleum Engineering Construction Corporation, Dagang Oilfield, Daqing Oilfield, Shengli Oilfield, China Oilfield Services Limited, SINOPEC Engineering (Group) Co., Ltd., Jereh, KERUI, Shanghai Shenkai and other institutions and companies attended the Conference.

The authority, accuracy and immediacy of information from cippe2019 Embassy (Oil and Gas) Promotion Conference are crucial for the enterprises to carry out the trade, investment, international cooperation and overseas expansion. When the participants interact with the speakers, they also submitted their demands to the economic cooperation department of the Embassy in China, laying the foundation for the subsequent cooperation.

The guests delivered the keynote speeches with the topics of New Oil and Gas Market in the Energy Structure Change, Oil and Gas Revolution in the Energy Transition, Chinese and Foreign Oil and Gas Cooperation, Investment Promotion of Participating Countries, New Pattern Cooperation for Chinese and Foreign Oil and Gas Industry and Trade Policy Interpretation.

Business Matchmaking Meeting

In order to promote information sharing, technical exchange and cooperation between exhibitors and professional buyers, the organizing committee held the Business Matchmaking Meeting during cippe2019 to build an one-to-one communication platform. During the Promotion Conference, the representatives from CNPC, Sinopec and CNOOC delivered the speeches on Management and Practice of China Petroleum Materials and Equipment Bidding under New Situation", Improvement of Safety and Timeliness of Materials and Equipment, and International Petroleum Engineering Company Procurement from China.

More than 200 companies from 16 countries including China, Russia, Canada, Estonia, Saudi Arabia, Kuwait, India and Nigeria attended the cippe2019 Business Matchmaking Meeting.

According to the purchasing requirements proposed by international companies, such as Gazprom Bureniye LLC, LLC Gazpromneft STC, Delvina Gas Ltd, Specialities Energy Company, Eesti Energia, Steel Giant Corporation, Cybertechneinity Gas LTD, Dolf Petroleum Company, PMPI Management Enterprises, Universal Glory Special Products and IMPEXCO S.A, the organizer arranged the exhibitors to conduct more than 130 business matchmaking with them on-site.

International Petroleum & Petrochemical Technology Conference 2019

The Conference aims to establish an extensive and effective exchange and cooperation platform for the industry so that we can timely keep abreast of the development of the industry and master the latest technology, to solve the problems quickly and accurately. With the theme of "The Challenges Faced by Technological Innovation in the Petroleum and Petrochemical Industry", the Conference conducts technical exchange closely around drilling & production technologies, oilfield chemistry, oil and gas storage and transportation and flow assurance technologies, offshore drilling & production systems, gathering and transportation systems, refining and chemical technologies, machinery, materials, corrosion protection technologies, intelligence and information technologies, environmental monitoring, HSE management, and other fields.

CING2019 Natural Gas Conference

The CING2019 Natural Gas Conference focuses on new technologies, new directions and new developments in the natural gas industry. The topics refer to the development prospect of China's LNG, the price of natural gas under new situations, the openhole well measurement technology, the application prospect of using natural gas as marine fuel, the development of annular pressure quick-opening closure, and the application of the small and medium-sized LNG transport ship.

CIPE Oil and Gas Pipeline Conference

The first CIPE Oil and Gas Pipeline Conference was held on March 27 in W105 Conference Room of Beijing New China International Exhibition Center. The Representatives from Steel Pipe Branch of CSPA, Tianjin Pipe (Group) Corporation, Beijing Juncheng Industrial Investment Group, HBIS Group Co., Ltd., Singapore Talcyon and other enterprises attended the conference and delivered the wonderful speeches.

cippe Gold Award of Innovative Product

Advanced Top Drive and Top Drive Casing Running System Won the 8th cippe Gold Award of Innovative Product

Zhang Laibin (right), Member of the Standing Committee of the CPPCC and President of China University of Petroleum, presented the "cippe Gold Award of Innovative Product".

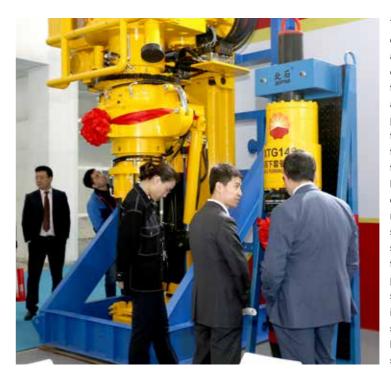

On March 27th-29th, the 19th China International Petroleum & Petrochemical Technology and Equipment Exhibition (cippe2019) was held at New China International Exhibition Center in Beijing. The Advanced Top Drive and Top Drive Casing Running System, developed by Beijing Petroleum Machinery Company Limited (BPM) of CNPC Engineering Technology R&D Company Limited, was awarded the 8th "cippe Gold Award of Innovative Product".

As the highest award of China International Petroleum & Petrochemical Technology and Equipment Exhibition, "cippe Gold Award of Innovative Product" was known as "Oscar" for petroleum and petrochemical industry. The judges of this Award are composed of academicians of Chinese Academy of Engineering, senior experts of energy enterprises and Presidents of Petroleum Universities. There are 1800 exhibitors from 65 countries and regions around the world and carried nearly 10,000 kinds of products to attend this Exhibition so that the selection competition is fierce. Finally, the "Advanced Top Drive and Top Drive Casing Running System" won the Award due to the strong pertinence of product (providing personalized configuration according to drilling depth, geologic characteristics and the like), and the unique technical innovation in the field of automatic drilling.

Presentation of Gold Award of Innovative Product

The Advanced Top Drive and Top Drive Casing Running System, developed by Beijing Petroleum Machinery Company Limited (BPM) is an electromechanical and hydraulic integrated product, the series of which cover the drilling depth of 3000-12000 meters and can be applied to the special stratum, like shale gas. The advanced control technologies of soft torque, drag reduction by torsional pendulum, etc. are developed. The series of product has obtained more than 20 patents, and passed through the certification of standard products of API Spec 8C, 7-1 and others, API Q1, API Q2, ISO 9001 and other quality management system certification, as well as CCS product inspection, CCS type approval and electrical control room explosion-proof certification.

The special top drive developed for the difficulties in exploiting unconventional oil and gas resources, such as shale gas, extends the advantages of traditional top drive and upgrades multiple software and hardware and the main performance parameters are improved by more than 25% accordingly. By integrating the technologies of top drive and soft torque, the service life of PDC bits can be effectively prolonged, the number of pulling out and drilling down can be reduced averagely by 2-3 times for single well so that drilling costs can be saved. By the control technologies of top drive and drag reduction of torsional pendulum, the friction of horizontal segments can be effectively overcome to improve the average mechanical drilling speed of the sliding orientation segment by 20-66% so that the cost of rotary steering can be saved.

Gala Dinner ▶

On the evening of March 27th 2019, The Gala Dinner of cippe2019 was held at Crowne Plaza Beijing International Airport. During the dinner, the music and dance performances, lucky draws and other excellent performances were arranged. More than 600 guests from home and abroad, including the guests and exhibitor representatives, gathered together to talk about each other and to enjoy the feast.

Media ►

The 19th China International Petroleum & Petrochemical Technology and Equipment Exhibition (cippe2019) established a strategic cooperation with more than 300 international media. The Exhibitors, buyers, experts and visitors in related industries were closely linked through multidimensional channels, such as the Internet, magazines, newspapers and social media. The international media deliver the information of cippe exhibition, conferences and concurrent events to the visitors in the petroleum and petrochemical industry. At the same time, the feedback is submitted to the organizer in time, so that the overall efficiency of the exhibition is further enhanced through the effective interaction!
